PROFESSIONAL SUMMARY

Full stack developer with 5 years building web and mobile applications. Core stack React, Next.js and TypeScript, with backend work in Node.js, Express, Prisma and PostgreSQL, and mobile apps in React Native and Expo. Comfortable owning a project from design handoff to production, writing clean, maintainable code.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, Tailwind CSS, TanStack Query, GSAP, Responsive Design, Web Accessibility, Performance Optimization

Backend: Node.js, Express.js, REST APIs, PostgreSQL, SQL, Prisma ORM, JWT Authentication, Zod

Mobile: React Native, Expo

Tools & CMS: Git, GitHub, Sanity CMS, SEO

WORK EXPERIENCE

Software Developer, Jacob's House

Nov 2025 – Jun 2026

- Built a responsive, high-performance studio website in React and TypeScript to modern accessibility standards.
- Integrated Sanity CMS so the team could manage and update content without developer involvement.
- Implemented interactive GSAP animations and visual effects to lift engagement across the site.
- Worked closely with designers to translate UI/UX designs into pixel-perfect, responsive interfaces.

Software Developer, ChopBeta

Feb 2025 – Oct 2025

- Managed cart and food-selection state across the app with React useContext for a consistent ordering experience.
- Built backend APIs with Node.js and Express for multi-item menu browsing, order creation and order management.
- Implemented JWT-based authentication to secure user accounts and sessions.
- Integrated Paystack to handle secure online payments and multi-item transactions.
- Implemented robust error handling and a notification system to ensure a smooth user experience.

Front-end Developer, Affinity Energy Solutions

Jul 2024 – Jan 2025

- Built responsive, high-performance web applications with Next.js and TypeScript.
- Structured content workflows in Sanity CMS, making the site easier for the team to maintain.
- Implemented interactive GSAP animations to improve engagement and interface quality.

Front-end Developer (Contract), Fritz

Nov 2023 – Jul 2024

- Built responsive, high-performance interfaces for an Ethereum-based platform in React and TypeScript.
- Developed clean, reusable UI components for blockchain-focused features.
- Implemented a Neobrutalist design system, translating UI/UX concepts into pixel-perfect interfaces.
- Added smooth GSAP animations and transitions to enhance interactivity and visual storytelling.
- Collaborated with designers and backend engineers to deliver features aligned with product goals.
