PROFESSIONAL SUMMARY

Full stack developer with 5 years of experience building web and mobile apps. Works mostly in React, Next.Js and TypeScript, with backend work in Node.js, Express, Prisma and PostgreSQL, and mobile apps in React Native and Expo. Takes projects from design handoff to deployment and writes code that is easy to read and easy to change.

TECHNICAL SKILLS

Frontend: React, Next.Js, TypeScript, JavaScript, Tailwind CSS, TanStack Query, GSAP, Responsive Web Design, Web Accessibility, Web Performance Optimization.

Backend: Node.js, Express.Js, REST APIs, PostgreSQL, SQL, Prisma ORM, JWT Authentication, Zod.

Mobile: React Native, Expo

Tools and CMS: Git, GitHub, Sanity CMS, SEO

WORK EXPERIENCE

Software Developer, Jacob's House *Nov 2025 - Jun 2026*

- Built a responsive, high-performance studio website with React and TypeScript, following modern accessibility standards.
- Worked closely with a team of designers to implement and refine UI/UX designs.
- Integrated Sanity CMS to give the team an efficient, maintainable content workflow.
- Added interactive animations and visual effects with GSAP to increase user engagement.

Software Developer, ChopBeta *Feb 2025 - Oct 2025*

- Developed order management features for student orders, including real-time updates and state synchronization.
- Built scalable backend APIs for multi-item menu browsing, order creation and . management.
- Implemented robust error handling and a notification system to ensure a smooth user experience.
- Raised code quality with automated testing, documentation and GitHub version control practices.

Front-end Developer, Affinity Energy Solutions *Jul 2024 - Jan 2025*

- Built responsive, high-performance web applications with Next.js and TypeScript.
- Integrated Sanity CMS to structure content workflows and make the site easier to maintain for developers and stakeholders.
- Implemented interactive animations with GSAP to improve engagement and interface quality.

Front-end Developer, Fritz *Dec 2023 - Jun 2024*

- Built responsive, high-performance interfaces for an Ethereum-based platform using React and TypeScript.
- Created clean, maintainable UI components for blockchain-focused functionality.
- Implemented a Neobrutalist design system across the application, translating UI/UX concepts into pixel-perfect interfaces.
- Collaborated with designers and backend engineers to deliver features aligned with user needs and product goals.

Front-end Developer, NanoHertz-IOT Technologies *Jan 2023 - Nov 2023*

- Built reusable React and TypeScript components from design mockups, so new screens were quicker to put together.
- Developed and maintained the web interface for the company's IoT products.
- Fixed bugs and shipped new features by working directly with engineers and designers.
- Made the interface responsive and accessible across phones, tablets and desktops.

EDUCATION

Landmark University, 2022
